Day trip to Bartolome Island & Sulivan Bay

Program Details

The pick-up will be at 6.15 h and we will take you to the Itabaca Canal to board the yacht.

The trip to Bartolomé will last approximately 2.5 hours. Bartolomé has the most beautiful and photographed landscapes of the archipelago. The path is made of wood and you will have to climb to the top of this dormant volcano. From there, you will be surprised with this spectacular landscape and, after reaching the top of the wooden stairs, you will feel it was worth it.

The main attraction of the island is the Pinnacle Rock. It is a great lava formation that time has been eroding. Bartholomew has two beautiful crescent-shaped beaches with golden sands that invite you to sunbathe or snorkel around lava formations. Do not be surprised if you discover Galapagos penguins or sea turtles swimming in the shallow waters.
